

Renewable Energy Workshop

Purpose

+

Objectives

+

Challenges

Dr. David DeYoe - Bio-Trend Systems Inc.

Purpose

Provide awareness and a basic understanding of conservation measures and renewable energy alternatives suitable for residential, small business and institutional settings, individually or as part of cooperative ventures

Objectives

- Provide individuals with appropriate information to enable them to ask questions relevant to their particular interests or needs.
- Provide information and tools that enable individuals to explore options.
- Provide access to sites/contacts that can assist individuals and groups in making more informed decisions.
- Stimulate interest in development of renewable energy committees and/or cooperatives to optimize costs/benefits.

Challenges

A pair of hands is shown holding a small, detailed globe of the Earth. The hands are positioned at the bottom and sides of the globe, with fingers gently gripping it. The globe shows continents and oceans in realistic colors. The background is a soft, out-of-focus light blue and white, suggesting a sky or water surface. The overall image conveys a sense of care, responsibility, and global stewardship.

- Translating global threats into local successes.
- Creating an “Energy Smart” culture.
- Engaging families, home and business, in the art and science of energy conservation.
- Understanding all the energy options, finite, recyclable and renewable, in a manner that enables smart and sustainable choices.
- Being patient and pragmatic in maneuvering through the gloss, the rhetoric and the misdirection.

Challenges

- Adopting cooperative strategies among individuals, companies and communities that help optimize energy solutions.
- Developing enabling and accommodating regulatory and incentive policies that expedite implementation of clean/green energy options. Note: the Green Energy Act initiative.
- Retaining and improving our life style using sustainable energy practices in light of social, economic and environmental objectives.
